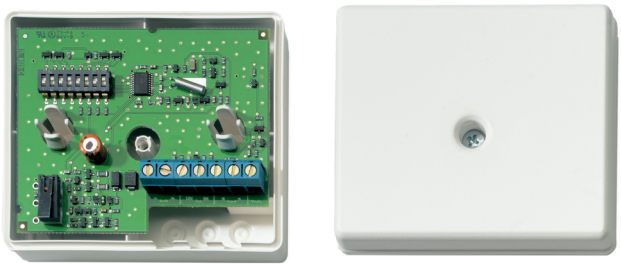
AD011

External addressable device interface



Details

- 2/4 wire external interface
- One EOL inputs to monitor alarm and tamper relay
- One output to trigger the LED
- If needed powered through auxiliary power supply
- Used for any sensor

AD011

External addressable device interface

Technical specifications

General

Accessory group	Bevægelsessensorer
Type	Modul
Address range	0 to 255

Electrical

Operating voltage	12 VDC, 24 VDC
Current consumption	520 µA current consumption from bus
External power supply	9 to 13.8 VDC

Physical

Physical dimensions	70 x 82 x 31 mm (W x H x D)
Colour	Hvid

Environmental

Environment	Indendør

Regulatory

Certification	VdS

Bus specification

Bus protocol	Interlogix property
Bus voltage	12 VDC or 24 VDC

Unit load for DGP

	2

Output

Open collector current output	100 microA max.

EOL resistor

	2 x 4k7
