TH010

Testutrustning för värmedetektorer för anslutning till 230 VAC

General

The Edwards range of detector test and service equipment allows the user to rapidly and easily remove or test practically all smoke and heat detectors. Lightweight and rugged materials ensure long life and allow servicing up to heights of 9 m. The tools have an integrated design providing a complete solution with the minimum number of components.

Composition

All the test and removal tools fit to lightweight, strengthened, fibreglass poles. The poles are non conductive for safe operation. The telescopic pole extends from 1.3 m to 4.5 m in four sections, and up to three 1.2 m extension poles can be added for maximum reach. A stylish canvas carry bag is available to hold and protect all the equipment.

Smoke testing (TR010 and SC008)

The touch sensitive aerosol dispenser is also on a swing frame. The robust, injection-moulded design allows it to withstand the rigours of everyday use. It allows the test gas canister to be pre-pressed so that only a small upward pressure is needed to release the gas. The transparent cup allows the user to see the illuminated LED of the activated detector. The dispenser and patented diaphragm conserves the aerosol, and detector testing is efficient and fast using a minimum amount of test gas.

The test aerosol is the result of an extensive two year research programme providing the most efficient and safest way to test both ion and photo smoke detectors. With a minimum impact to health, safety and the environment, the non-toxic, non-flammable particles allow fast response and clearing times and leaves smallest amount of residue. No damage to the detector plastic and components is also ensured.

Heat testing (TH010)

The TH010 is a 230 VAC, mains operated heat detector test tool on a swing frame with transparent cup. This tester may be used to test temperature detectors after installation, during commissioning and maintenance.

TH010

Testutrustning för värmedetektorer för anslutning till 230 VAC

Tekniska specifikationer

Kompatibla produkter

Kategori	Referens	Beskrivning
Test Equipment	CB001	Canvas Carrying Bag for the Test and Service Equipment
Test Equipment	ET010	Teleskopstång av glasfiber 4,5 m. Avsedd för nedtagningsdon FG010 och testutrustning TR010, TH010 och TH012
Test Equipment	ET011	Förlängningsrör 1,2 m. Avsedd för nedtagningsdon FG010 och testutrustning TR010, TH010 och TH012
Test Equipment	FG010	Universellt nedtagningsdon, passar de flesta på marknaden förekommande detektorer (stång ingår ej ET010).
